Do you want to join Connecticut Children’s in the fight against COVID-19?

If so, contribute to research and give us your spit!

If you or your child have tested positive for COVID-19 and have mild or no symptoms, you may be eligible to participate in an important research study.

Spit can help kids!

Saliva has the potential to help us create a test that will help identify kids who are sick with MIS-C, a complication from Covid.

All we need is a small saliva sample and for you or your child to answer one or two surveys every two months.

Are you or your child eligible?

- Age birth to <21 years
- Tested positive for Covid within last 7 days and have mild or no symptoms

Participants will receive a $50 gift card for joining the study

If you are interested or would like to know more, please contact the study team for more information:
