PARENT ENGAGEMENT WORK GROUP: CHILD ABUSE PREVENTION WALK

Saint Francis Hospital in Hartford CT is one of five national demonstration sites conducting a Child Safety Forward Project to work to develop models to reduce preventable child death and repeated injuries.

The Hartford project is unique because it centers power in parents and community members. The Parent Engagement Work Group of the project consists of a core of parents who are learning, sharing with their communities, and serving on a Stakeholder Group with State Agencies, Community-Based Agencies and Service Providers.
